

# Printing Instructions

---

After designing your wristbands using the detailed instructions found at [jetbands.com](http://jetbands.com), please follow these basic printing instructions.

- 1 Load Paper**  
Ensure that the wristband sheets are correctly inserted into your paper tray according to your printers specifications. **Note:** We have indicated the side to print on with the words "PRINT ON THIS SIDE" located on the side margins.
- 2 Initiate Print**  
On your computer, print the file to your printer using your desired print settings.
- 3 Allow Sheet to Dry**  
After your wristbands have been printed, allow 1 minute for your wristband sheets to dry before handling them.
- 4 Tear & Wear**  
First remove the half-inch margins by tearing at the perforations and dispose. Then tear the wristbands apart at the perforations. To wear the wristband, remove the wax paper on the back of the wristband to uncover the adhesive. Wrap the wristband around your wrist with your printed design facing up and enjoy!
